SECURITY INFORMATION

Attachment A

Heiland booklet

1. I need a couple of new Heiland batteries. The batteries here now have remained in storage for such a long period of time that the plates will no longer take a charge. If you send new batteries, be sure to include some battery acid. Would also like a double electrical plug - the type I can plug into a transformer and charge two batteries at once - the conventional flat male prongs and female recepticals. If you send me any of those curved plugs, please include some adapters. One of the strobe lights is also inoperative, so will need either repair parts or a replacement. send

2. Army G-2 working papers Nos. 1 and 2. <sup>25X1C8c</sup> [REDACTED] has received a copy of the No. 3 working paper.

3. About a dozen of the new type of mounting cards and the set of titling instructions. Also any progress report on the IBM.

4. Results of any photographic tests conducted there in the office.

5. Current information on film footage and when I can expect duplicate copies.

**BEST COPY**
